Abstract (en)

It is described a tub for food products, comprising a body of the tub (11) and a lid (12) for closing said body of the tub (11), where the body of the tub has a peripheral wall (13) rising from a bottom wall (14) and terminating with a top peripheral flat band (15) outwardly protruding and extended parallel to the bottom wall (14), wherein the body of the tub (11) comprises a resting step (16) extended between the peripheral wall (13) and the flat peripheral band (15) running inside and at a lower level with respect to the flat peripheral band (15), substantially parallel to the latter, and a coupling rib (19) rising from the resting step (16) up to a slightly lower level with respect to said flat peripheral band (15), and wherein the lid (12) is provided with a peripheral rim (20) defining a throat (21) intended to receive the coupling rib (19) so that the lid (12) when closing the body of the tub (11) is rested and retained on the resting step (16), circumscribed by, and at a level substantially equal or slightly lower than the flat peripheral band (15).
