Abstract (en)

[origin: EP2514682A1] The frame has a bottom portion (22) supporting a plastic inner container of transport and storage containers. Corner feet (23) comprise a corner foot body with a front wall (26), and partial bodies. A lower supporting surface of each partial body comprises a connection region that connects the feet with a foot frame (25). Stop tabs are arranged between a peripheral edge (28) of the front wall and the connecting region to define a distance between the peripheral edge and a support edge for supporting the frame on an outer jacket (18) of each container. The jacket is made of metal mesh/sheet.
