Abstract (en)
[origin: EP2514892A2] The system (100,200) comprises a door leaf profile (1,101) with an undercut longitudinal groove (4,104), whose opening (5,105) is formed of two longitudinal ribs (6,7,106,107) that are arranged on opposite sides of the longitudinal groove. A mounting assembly (12) is provided, which has two clamping elements with clamping grooves. The clamping elements are displaceable between a primary position and a secondary position, where the clamping elements are guided into the opening of the longitudinal groove. An independent claim is also included for a door with a door leaf, a door frame and a system for mounting a fitting.
