Abstract (en)
[origin: EP2514919A1] The concrete molding compound has two connecting elements (02) arranged in two concrete molded parts with groove sides which are laid opposite to each other in a groove, where the concrete molded parts are adjacent at each other in the groove in completed condition of the concrete molding compound. A connecting unit has a sleeve (12) and a pin that is connected with the sleeve in the completed condition of the concrete molding compound. The sleeve is connected with one of the connecting elements.
