Abstract (en)

[origin: EP2338331A1] The present invention relates to methods and compositions for controlling microbial growth on clean room equipment, preferably on clean room clothing. More particularly, the invention is directed to a corresponding method comprising contacting the clean room equipment to be treated with one or more antimicrobial agents; and incubating the clean room equipment for a pre-selected period of time, wherein the one or more antimicrobial agents are of organic origin. In a further aspect, the invention relates to a kit-of-parts, comprising one or more antimicrobial agents selected from the group consisting of microorganisms, preferably bacteria and fungi, and metabolites produced by said microorganisms for performing a method as defined herein.
