Abstract (en)
[origin: WO2011077060A1] The invention relates to headgear that can be converted into another object, comprising a figurine (2) provided with a hollow base (4) which, in at least one configuration, defines an object including a volume for receiving an element (5). In a second configuration, the hollow base (4) can be turned partially inside out to form a second object including another reception volume and, in a third configuration, the hollow base can be turned fully inside out to form a third object.
