Abstract (en)

[origin: WO2011076331A1] The invention relates to a vehicle equipped with two lateral walls (9) that can be spaced apart relative to each other in the transverse direction (8) and are fastened to a vehicle frame (2). The lateral walls serve to limit a working space (7) that is open in the direction of a track (5) and is provided for carrying out maintenance work. Each lateral wall (9) is made up of two wall sections (14-16) arranged one behind the other with respect to the longitudinal direction (3) of the vehicle and adjustable relative to each other.
