Abstract (en)
[origin: WO2011076532A1] The invention relates to an elevator having at least one elevator body (2, 5) which can be displaced along a track (1) and has at least one guide element (3), which is guided by a plurality of counter-pieces (4) of the guide element (3) connected in a stationary manner to the track (1) and lying atop one another in a vertical manner. According to the invention, the guide element (3) is always engaged by at least two counter-pieces (4).
