Abstract (en)

[origin: WO2011083249A1] One subject of the present invention is a malleable solid explosive in the form of a solid block consisting, for at least 98% of its mass, of a powdered explosive charge and a liquid chosen from polyol polymers from the group of polyol polyisobutylenes, polyol polybutadienes, polyol polyethers, polyol polyesters and polyol polysiloxanes, the number-average molecular weight of which is between 500 and 10 000, and blends thereof. Another subject of the invention is a method for obtaining such an explosive.
