Abstract (en)

[origin: WO2011077056A1] The invention relates to a method for treating the surface of a device for dispensing a fluid product, characterised in that said method comprises a chemical grafting step in order to form a thin film on at least one supporting surface of at least one part of said device, which is in contact with the fluid product during the actuation of said device, the thin film having anti-adherence properties for the fluid product.
