Abstract (en)
[origin: WO2011080161A2] The invention relates to a strongbox (1) comprising a first hollow body (2) having an access (6), a system for opening and closing the strongbox, electrical lines connected to a device for opening and closing the access door (6), wherein a second hollow body (3) is movably disposed in the first hollow body (2) and has at least two compartments (4, 5), wherein the second hollow body (3) is alternately adjustable, such that each compartment (4, 5) can be brought into alignment with the access opening (6). According to the invention, the second hollow body (3) can be adjusted by means of a motor (9) disposed in the first hollow body (2) and at least one compartment comprises at least one wall for accessing the motor (9) and/or the mechanical elements and/or the electrical parts of the displacement mechanism, designed for an intentional rupture.
