Abstract (en)

[origin: WO2011076578A1] The invention relates to a method and device for operating technical equipment, in particular a motor vehicle, wherein speech inputs are fed by means of a speech input unit (3) and manual inputs are fed by means of a manual input unit as operating instructions to a controller (10), by means of which a command corresponding to the operating instruction is generated and fed to the corresponding technical equipment, which then executes the operating procedure associated with the operating instruction. A basic structure of the command is established by the speech input unit (3) or the manual input unit, and then the basic structure of the command is supplemented by the manual input unit (3) or the speech input unit.
