Abstract (en)
A buckle is disclosed. The buckle includes a buckle body (10) having a raised front wall which extends to protrude upwards, the buckle body being formed with a pair of transverse slots, into which a strap (S1) is fitted, and an engagement portion, which are respectively placed at front and rear sides of the raised front wall, an engagement unit (20) formed, at a rear end thereof, with a pair of fixed slots into which another strap (S2) is fitted, the engagement unit being formed, at outer surfaces of opposite lower sides of a front end thereof, with hinge stoppers, respectively, and a position fixing unit (30) for fixing a position of the engagement unit in a state in which the engagement unit rests on a base of the buckle body.
