Abstract (en)  
[origin: EP2517974A1] The water or soft drink bottle (1) has a drinking nipple (9) of a nipple body made of plastic material, at which a nipple portion is formed. The nipple portion is made of another plastic material. A retainer is sealed in a closing position by an annular bead. Another annular bead is formed at the nipple portion. The retainer is sealed in a drinking position by the latter annular bead. A ventilation groove is provided at the latter annular bead. The ventilation provides subsequent flow of air in the drinking position through the retainer into the interior of bottle body (2) during drinking.
