Abstract (en)

[origin: EP2518006A1] The truck (1) has a vehicle body (K), and a driver workstation arranged in an inner side of a driver canopy (5). The driver canopy is arranged at the vehicle body in a raisable and lowerable manner by a driving device. The driver canopy is lowered on the vehicle body in a lowered position. Operating elements (40, 41) for operating the driving device are arranged at an outer contour of the vehicle body. The driver canopy has a supporting structure that comprises two vertical rods, where the rods are arranged at a distance from each other in a vehicle transverse direction.
