Abstract (en)  
[origin: EP2518233A1] The support (1) has two glass panes (2) arranged in series along a longitudinal direction (A), and a frame (20) for the panes. Two longitudinal elements (21) are arranged along the longitudinal direction. Three cross elements (22) are arranged vertically to the longitudinal elements and between the panes. A clamping apparatus (10) runs along the longitudinal elements and clamps the panes with the cross elements. Two ends of the cross elements comprise projections with a recess, which extends over an edge of the panes. The clamping apparatus runs through the recess of the projections.
