Abstract (en)

[origin: EP2519076A2] The module has a planar positive temperature coefficient (PTC) element (1) with two contacting areas (9, 10), and heat conducting slats (5, 6) arranged in an air flowable heat output region (7), where the slats are heat conductively connected with the PTC element. Heat and current conducting cores carry the slats and are divided into core parts (3, 4). The PTC element is arranged between the core parts and lies at the core parts with the contacting areas respectively. An attachment unit (11) engages and fixes the core parts and the PTC element.
