Abstract (en)  
[origin: WO2011080234A2] The invention relates to a container for receiving and discharging a liquid and/or dissolved pharmaceutical or cosmetic active substance, for example, comprising at least one outlet organ (5) for discharging the one active substance, preferably in a portioned manner. At least two separate receiving chambers (9, 11) are further provided, of which at least one contains the one active substance and at least one comprises a liquid at least mostly free of active substance and/or a further active substance different from the one active substance, wherein the outlet organ is connected to the at least one chamber containing an active substance for discharging.
