Abstract (en)

[origin: WO2011080088A2] The present invention relates to a washing machine (1) comprising a detergent box (2) having at least two outer compartments (3, 103) wherein cleaning agents are placed and at least one middle compartment (4) located between the outer compartments (3, 103), wherein cleaning agents are placed, a flushing device (5) placed onto the detergent box (2), providing water to be directed into the detergent box (2), a lid (6) located on the flushing device (5), providing water taken from mains to pass to the flushing device (5), a first water inlet (7) located on the lid (6), transferring water taken thereby from mains to the flushing device (5) in an angular way and a second water inlet (8) located on the lid (6), transferring water taken thereby from mains to the flushing device (5) such as to block the water transferred from the first water inlet (7).
