Abstract (en)
[origin: WO2011080214A1] The present invention relates to a laundry dryer (1) comprising a drum (2) which can rotate around itself, having a cylindrical horizontal axis body (3) and a ring-shaped front lid (4) forming the front surface of the body (3) and a circular flange (7) surrounding the inner edge of the front lid (4) and extending perpendicular to the front lid (4) towards outside and bearing members (5) in protrusion form, bearing against the flange (7), on which the drum (2) rotates by sliding during the drying process.
