Abstract (en)  
[origin: WO2011039485A2] The invention relates to an insulated wall comprising: a wall (1) of masonry elements (7) that are solidly connected to one another using a mortar or cement, thermal and/or acoustic insulation (2), and a facing (3). The invention is characterised in that at least part of the masonry elements (7) comprise preformed holes (4) that can receive elements (11, 5, 6, 8) for securing and maintaining the thermal and/or acoustic insulation (2) and the facing (3). The invention also relates to a method for lining a wall (1) in order to produce the insulated wall, a masonry element belonging to the insulated wall, and a method for preparing said masonry element.
