Abstract (en)
[origin: WO2011080465A1] The invention relates to a method for transmitting content i by means of a supplier of said content, which comprises: a step (210) of said supplier receiving a request from a requester to transmit content i; a step (225 to 240) of said supplier obtaining an estimate Ni of a number of suppliers of said content; and a step (245) of transmitting the content i, during which said supplier transmits to the requester at least one portion of the content i, attributing to the requester an average proportion of the bandwidth allocated by said supplier to the distribution of contents, calculated as a coefficient, according to the number Ni of suppliers of the content i and a real value A, which is common to all the contents to be transmitted and used to adjust the impact of the number Ni of suppliers of the content i on said coefficient.
