Abstract (en)

The present invention relates to an auxiliary support device (1) for a piece of furniture (M) to be fixed to a wall (P), said piece of furniture comprising at least two sides (L), a bottom (F) and an upper joint element (C) joining the sides, said auxiliary support device (1) being adapted to cooperate with a mounting assembly comprising at least two lateral mounting brackets (50) each fixed to at least one side (F) and provided with engaging means (55) cooperating with at least one support plate (20) fixed to a wall (P). In particular, said auxiliary device (1) is adapted to be fixed to the bottom (F) and to the upper joint element (C) in at least one intermediate position between said two sides (L).
