Abstract (en)

[origin: EP2520210A1] The appliance (1) has a container (2) for receiving a material to be processed. The container is attached with force sensors (4-7) in an upper region to support the appliance against a surrounding kitchen furniture or a wall in an installed state and/or to support against external forces in a stacked state during transport or intermediate storage condition. Outer-housing walls (8, 9) are secured at a front part (V) of a quadrature axis component (S) against a pull-off force. The sensors are arranged in front side (3) of the container, where the front side of the container faces toward a user.
