Abstract (en)

The present invention is directed at a hand grip (20) for a rollator (1) comprising a first hand grip part (21) and a second hand grip part (22). The second hand grip part is positioned in front of the first hand grip part, wherein the first hand grip part is adapted to be held during movement of the rollator, and the second grip part is adapted to be a stand-up support. Furthermore, a rollator (1) having a hand grip, preferably two hand grips as described.
