Abstract (en)

[origin: EP2520507A1] The container (1) has side walls (5, 6) and longitudinal supporting walls (3, 4) pivoted with respect to a rectangular bottom (2). Stacking units e.g. stacking bars (7, 8), are connected to the supporting walls by film hinges (9), and integrally formed with the supporting walls. A lower surface of the bottom includes openings for receiving the stacking units when the container is folded or unfolded. An outer surface of the supporting walls comprises a recess for receiving tabs of the stacking units.
