Abstract (en)

[origin: EP2520846A2] The carrier element (2) comprises a U-shaped cross-sectional profile (4), and fastening elements (9a,9b,10a,10b), which are formed integrally in the U-shaped cross-sectional profile on opposite legs (5,6) of the carrier element for attaching a component (3) with the carrier element. The fastening elements are formed functionally as clinging elements. The fastening elements are oriented protruding in unconnected state of the carrier element obliquely with the component of the legs. An independent claim is included for an arrangement comprises a carrier element.
