Abstract (en)
[origin: WO2011082880A1] The invention relates to a hand power tool device comprising at least one drive shaft (12a-u), a drive motor (14a-u), an insert tool fixing means (16a-u), and at least one bearing unit (18a-u) which is provided for bearing the drive shaft (12a-u) on a side (20a-u) of the drive motor (14a-u), said side facing away from the insert tool fixing means (16a-u). The hand power tool device also comprises a sealing device which is provided for sealing at least one region (24a-u) which lies axially adjacent to the bearing unit (18a-u) and which lies on a side (20a-u) of the bearing unit (18a-u), said side facing away from the insert tool fixing means (16a-u). According to the invention, the sealing device has at least one sealing element (26a-u, 28g) which is designed separately from the bearing unit (18a-u).
