Abstract (en)

[origin: WO2011085171A2] The presently disclosed subject matter comprises a method and system for producing cleaning and/or sanitizing solutions using a replaceable cartridge system. Particularly, the consumables needed to electrochemically or chemically produce the cleaning and/or sanitizing solutions can be supplied in a cartridge in a quantity measured to last for the chosen design life of the cartridge. Alternatively, the cartridge can comprise cleaning and/or sanitizing precursors that can be pre-prepared and supplied in a highly concentrated form.
