Abstract (en)  
[origin: WO2011131257A1] The invention relates to a metering system (1) for releasing preparations in the interior of a washing machine, comprising a metering device (5) and a cartridge that can be coupled to the metering device, wherein said cartridge comprises at least three chambers (3a, 3b, 3c) containing flowable preparations which differ from one another. According to the invention, the first chamber contains at least one enzyme, selected from the group of amylases, mananases, cellulases, lipases and/or pectate lyases, and at least one surfactant and/or complexing agent, the second chamber comprises at least one protease and at least one surfactant and/or complexing agent, and the third chamber comprises at least one fragrance and/or an optical brightener.
