Abstract (en)

[origin: WO2011057954A2] The invention relates to a device for cleaning a component (4) of a dryer (1) having a liquid rinsing medium, comprising a diffuser (9) for distributing the rinsing medium disposed over the component (4), wherein the diffuser (9) comprises a distribution channel (12) extending over the width thereof for distributing the rinsing medium introduced into the diffuser (9) and a transition region (13) fluidically connected to the distribution channel (12), by means of which the rinsing medium can be fed downward in the vertical flow direction P4 to the component (4). The invention further relates to a dryer having such a device.
