Abstract (en)

[origin: WO2011083257A1] Method and device for regulating the temperature in a dwelling having microporous walls (10) and having external thermal insulation (12), by circulation of external air in a wall (10) and/or between a wall (10) and its thermal insulation (12) depending on the moisture content of the external air, and the moisture content of the wall and on the heating or cooling of the wall (10), the temperature of which is measured by means of sensors (30, 30') mounted facing the wall and/or in the wall (10).
