Abstract (en)

[origin: WO2011082813A1] The invention relates to a device (10) for processing value documents (10), comprising a display device for displaying information relating to the processing and/or the value documents, and a control device, which actuates the display device, can optionally be operated in a configuration mode and a working mode, in which the device can process value documents, and comprises a graphical user interface, by means of which at least one representation with an information field can be displayed on the display device at least in the operating mode and which provides an alphanumerical field and a graphical field for displaying the information field, and which in the configuration mode is designed to either establish the alphanumerical field or the graphical field for representing the information field in the working mode in response to a selection signal.
