Abstract (en)
[origin: WO2011083031A1] The invention relates to a spring terminal (1), in particular a front terminal, for connecting an electrical conductor (4) to an electrical assembly (5), having a contact part (3) and having a housing part (2), wherein the electrical conductor (4) can be inserted in the housing part (2) for connecting to the contact part (3), wherein the spring clamp (1) comprises an insertion opening (7) for an actuating means (8), in particular a screwdriver, wherein the contact part (3) comprises a clamp jaw (31, 32, 33, 34) that can be adjusted by means of the actuating means (8) from a sliding state in which the conductor (4) is not clamped to the clamp jaw (31, 32, 33, 34) into a clamped state in which the conductor is clamped to the clamp jaw, wherein the clamp jaw is electrically conductive.
