Abstract (en)

[origin: EP2522245A1] The apparatus (A) has an elongated gripping unit i.e. handle (2), offering a hand gripping zone (Z) for a user, and a control unit (3) to control operation of the apparatus. The control unit has an elongated control lever (5) extending parallel to another elongated control lever (4) and being accessible to the area. The former lever is rotated with respect to the handle along a rotation axle located close to a proximal end of the former lever. The end of the former lever is located opposite to that of the latter lever, and the axle is parallel to a rotation axle of the latter control lever.
