Abstract (en)

[origin: EP2522782A2] Device for adjusting the position of pipe endings at mounting has a flat body (1) with two oblong hubs (3) with a fixed pitch. The hub axis (3) are parallel and in the hub axis (3) connecting elements (2) with a thread (14) are placed. Flat body (1) has at least two one-dimensional vials (4,5) or at least one two-dimensional vial to determine the horizontal position of the device. Flat body (1) has a predetermined spacing of the connecting elements (2), preferably 100 or 150 mm and in a preferred arrangement will have a rotary arms (9) with adjustable stops (10). The device can contain a plate adapter (7) for connecting concealed mixing boxes. Plate adapter (7), as part of the device and also as a standalone product designated later for connection to a device includes a group of holes (16) and two holes (15) with threads for connection to the connecting element (2).
