Abstract (en)

[origin: EP2522801A2] The wall structure (1) has a window opening and a window plate mold part (10) arranged at the window opening, where a load-bearing support wall (2) is provided with a window sill. An insulating layer (3) is formed as an intermediate wall portion. The window plate molded part arranges a support wall and is fixed at the support wall by a fastening unit (17) in a load-bearing manner. The intermediate wall portion is partially or completely overhanged. An independent claim is also included for a window plate mold part with a space inner side.
