Abstract (en)

According to one embodiment, a luminaire (100) includes a cylindrical main case (1) opened at both ends in a longitudinal direction and opened on a front surface side. A light source section (3) is attached to the inside of the main case (1). The openings at both the ends in the longitudinal direction of the main case (1) are closed by two end plate members (14). A seal-member disposing section (8) continuous in an annular shape is provided around the opening (11) on the front surface side of the main case (1). The seal-member disposing section (8) is provided over the main case (1) and the two end plate members (14). A ring-shaped seal member (62) is attached to the seal-member disposing section (8). A cover (6) having translucency configured to close the opening on the front surface side is attached in contact with the seal member (62).
