Abstract (en)

[origin: EP2522939A2] The refrigeration device (1) has a body (7), where a storage space (3) is arranged in the body for a thermally insulated inner container (2). A slide is equipped with a counter-abutment surface, where a hinge pin has a fixed stop surface. The fixed stop surface is designed for limiting one of the maximum opening angle of two door panels (4a,4b). The counter-abutment surface of the slide is applied at the maximum opening angle of the door panel.
