Abstract (en)

[origin: EP2523409A1] There is provided a method, apparatus, system and corresponding computer program product for providing an inter-domain service. The method comprises: user equipment agent subscribing a service provided by at least one other domain from a domain it belongs to; the user equipment agent acquiring information for accessing the subscribed service from the domain it belongs to; the user equipment agent accessing the subscribed service through the at least one other domain directly based on the acquired information without going through the domain it belongs to.
