Abstract (en)
[origin: US2011170806A1] A side-by-side or dual pouch comprising a pair of parallel longitudinal compartments each compartment including sealed top, bottom and medial margins with the medial margins in sealed abutment and providing a sealed longitudinal strip separating the compartments. Each compartment may contain different components, such as different types of food products. A single or dual tear-promoting element(s) appears on the side of the sealed upper margin of each compartment to facilitate separate opening of each compartment and controlled dispensing of the contents.
