Abstract (en)
[origin: WO2011086312A1] The invention relates to a packaging box (10), including a lower portion (12), an upper portion (14) forming a cover, a strip (16), and a thread (18). Said box is particularly usable for containing wrapped portions of melted cheese. The lower portion (12) and upper portion (14) each include a base (20a, 20b) and a side portion (22a, 22b). The strip (16) is elongate in a longitudinal direction and is connected to both side portions (22a, 22b) so as to ensure that the box (10) is tamper-proof before first opening it. The thread (18) is sandwiched between the strip (16) and at least one of the lower (12) or upper (14) portions and is moreover arranged such that one end (60) of the thread can be pulled toward the outside of the box. The strip (16) comprises a weakness line (38) that extends substantially in the longitudinal direction and is arranged so as to be broken by biasing the thread (18) toward the outside of the box.
