Abstract (en)

[origin: WO2011085712A1] The invention relates to a safety magazine (2) for a firearm (1), wherein the safety magazine (2) can be inserted into the magazine well or the magazine retainer (1a) of the firearm (1) and has a locking element (3, 17), wherein the locking element (3, 17) can be brought from an unlocked position into a locked position after the safety magazine (2) has been inserted into the firearm (1), and in the locked position a form closure is formed by the locking element (3, 17) and the firearm (1) in such a way that the form closure prevents the safety magazine (2) from being removed from the firearm (1), wherein an adjustment mechanism (6, 7, 17) and/or drive moves the locking element (3, 17) in the direction of the breechblock bottom (4) upon movement to the locked position.
