Abstract (en)

[origin: EP2524607A1] A method of drying cigars during their manufacture comprises the steps of: providing a plurality of tobacco rods; arranging the plurality of tobacco rods in a continuous layer; and applying a radio frequency, RF, radiation to the plurality of arranged tobacco rods having a first moisture level to thereby heat the tobacco rods at a temperature within the range of 190° - 212° F and reduce the first moisture level.
