Abstract (en)

[origin: EP2524739A2] The device (100) has housing (10) in which dust filter such as high efficiency particulate air (HEPA) filter, and fan for dust extraction are arranged. The housing has several air inlet sides and air outlet openings for blowing out the air in the housing. The adapter plate for suction hose or a releasable cover plate are detachably fastened at air inlet sides, such that free air intake at air-inlet sides, with no adapter plate or cover plate, or a suction by suction hoses with adapter plate is possible.
