Abstract (en)
The present invention relates to a reusable system for constructing a temporary building or tent. The present invention also relates to a temporary building or tent with such a system. The reusable system according to the invention comprises a pair of beams (3) which extend parallel in a first direction and which at an end are coupled on the upper side by a skirting (5) in a direction perpendicularly of the first direction. The system further comprises floor panels (12) extending perpendicularly of the first direction.
