Abstract (en)  
[origin: EP2525028A2] The component (1) has a connector element with different geometries that is fastened on a U-shaped monolithic receptacle portion (20). The latching units (21a,21b) with different length are formed in receptacle portion, and arranged in opposite manner. A space (26) is formed between one latching unit (21a) and walls (27a,27b). The locking elements (23a,23b) of the latching unit are attached with counter-latching element (11a) of the connector element. The angle of the connector element is set to 40-50[deg] .
