Abstract (en)
[origin: EP2525103A2] The arrangement has a ventilator, and a ventilator cover (10) comprising an aperture (12). The ventilator is arranged in the aperture, where air conveyed by the ventilator flows through the aperture during operation of the ventilator. The cover is partially or completely made from expanded polypropylene. A ventilator holder (20) is partially or completely arranged in the aperture of the cover for holding the ventilator. The holder is made from plastic e.g. acrylonitrile butadiene styrene or polystyrene. Damping elements (44) are arranged between a ventilator motor (40) and the holder.
