Abstract (en)  
[origin: EP2525155A1] A carrier device (1) for an inner compartment of a household appliance is adapted to receive a cooking tray and to constrain a movement of the cooking tray essentially to a horizontal movement, wherein the carrier device (1) comprises at least one single side-bar (12) having a plurality of bends (3) formed such that the single side-bar (12) constrains a vertical movement of the cooking tray. A household device is provided with such carrier device.
