Abstract (en)
[origin: EP2525176A2] The cooling and/or freezing appliance comprises a top portion, a bottom portion, a line extending between two sidewalls (10) of the appliance in cross-connection (20), and a door. A door support is pivotally mounted in the door, and the door is fixed to the front portion of the appliance. The door comprises a bearing bracket (50) or a multi-link hinge (60). The top portion and/or the door are designed such that different kinds of the door bearing can be fixed to them. The cross-connection of an angle profile is formed as an L-shaped profile.
